

No Sew Reusable T-shirt Bag

Supplies:

T-shirt
Sharp scissors
Ruler
Marker

Directions:

1. First cut off the sleeves of the t-shirt. Cut so that the seam is cut off.
2. Cut off the neckline, you may want to use a bowl or something to make a u shaped cut. For a longer handle cut deeper on the neckline.

3. It's not required but I like to cut off the bottom seam of the shirt.
4. Then from the bottom you are going to cut slits that will be tied. The slits should be 3-4 inches long and $\frac{3}{4}$ to 1 inch wide. You can make the slits longer if you want longer fringe. To make it easier you can turn shirt inside out and draw a line as a guide to how far to cut.
5. After you cut turn your shirt right side out and tie the bottom slit and top slit. You will need to double knot each one.

If you do not want fringe tie the shirt inside out and make shorter cuts just big enough to tie.
